P: Provisional

1. Population figure relates to mid year.
2. The net availability of foodgrains is estimated to be gross production (-) seed, feed and wastage, (-) exports (+) imports (+/-) change in stocks.
3. The net availability of foodgrains divided by the population estimates for a particular year indicates per capita availability of foodgrains in terms of Kg/ year.
4. Figures in respect of per capita net availability given above are not strictly representative of actual level of consumption in the country especially as they do not take into account any change in stocks in possession of traders, procedures and consumers.
5. For calculation of per capita net availability, the figure of net imports from 1981 to 1994 are based on imports and exports on Government of India account only, Net imports from 1995 are, however, based on the total exports and imports (both Government as well as Private accounts).

Notes:

P: Preliminary, PR : Partially Revised

- Grants received are covered under item 4(a).
- Estimated interest accrued and credited to NRI deposits during the year has been treated as notional outflow under invisible payments and added as reinvestment in NRI deposits under banking capital.
- In accordance with the provision of IMF's Balance of Payments Manual (5th Edition), gold purchased from the Government of India by the RBI has been excluded from the BOP statistics. Data for the earlier years has, therefore, been amended by making suitable adjustments in "Other Capital-Receipts and Foreign Exchange Reserves". Similarly, item "SDR Allocation" has been deleted from the table.
- With effect from 1996-97, private transfer receipts include redemption in rupees of both principal and interest under Non-Resident External (Rupee) Account [NRE(R)A] and Non-Resident Non-Repatriable Rupee Deposit [NR(NR)RD] schemes. This marks an improvement in data reporting.
- Totals may not tally due to rounding off.
